

IN THE CLAIMS:

Please accept amended claim 19 and new claims 48 and 49 as follows.

1. – 18. (canceled)

19. (currently amended) A video system comprising:

a base portion mounted in a vehicle seat headrest; and

a door pivotally attached to the base portion, wherein the door includes a display mounted to the door, and wherein the base portion includes a media player mounted in the base portion such that the media player is behind the door when the door is in a closed position, the base portion including an a first opening in line with a slot in the media player, wherein and the headrest includes a cut out portion configured and dimensioned to receive the base portion so that including a second opening in line with the first opening for receiving a data media is insertable to be inserted into the media player through the slot irrespective of the position of the door.

20. (canceled)

21. (original) The video system of claim 19, wherein the base portion is one of coupled to an internal headrest support structure and attached directly to the body of the headrest.

22. (original) The video system of claim 19, further comprising a wireless transmitter for transmitting wireless signals.

23. (original) The video system of claim 22, wherein the wireless transmitter includes at least one of an optical transmitting device and an antenna.

24. (original) The video system of claim 22, wherein the wireless transmitter is capable of transmitting the wireless signals on more than one channel.

25. (original) The video system of claim 22, wherein the wireless signals include at least one of audio signals and video signals.

26. (original) The video system of claim 22, wherein the wireless signals include at least one of infrared (IR) signals and radio frequency (RF) signals.

27. (original) The video system of claim 19, further comprising a port for connecting to an external device.

28. (original) The video system of claim 19, wherein the display is mounted on a front side of the door.

29. (original) The video system of claim 19, further comprising a cover for covering the display.

30. (original) The video system of claim 19, wherein the door is pivotally attached to the base portion with a hinge.

31. (original) The video system of claim 30, wherein the hinge is positioned at a top, bottom or side portion of the door.

32. (previously presented) The video system of claim 19, wherein:

the display and the media player are capable of operating when the door is in a closed position; and

the data media is inserted into the media player when the door is in an open or closed position.

33. (original) The video system of claim 19, wherein the vehicle seat headrest includes at least one vent for dissipating heat.

34. (original) The video system of claim 19, wherein the vehicle seat headrest includes a fan.

35. (original) The video system of claim 19, wherein the media player includes at least one of a DVD player, a CD-ROM player, a video game player, a videocassette player, a television tuner, a radio tuner, and a device capable of playing at least one of computerized video files and computerized audio files.

36. (original) The video system of claim 19, wherein the base portion includes a cavity for selectively housing the media player.

37. – 47. (canceled)

48. (new) A video system comprising:

- a base portion mounted in a vehicle seat headrest; and

- a display mounted in the headrest, wherein the base portion includes a media player mounted in the base portion such that the media player is behind the display, the base portion including a first opening in line with a slot in the media player, and the headrest including a second opening in line with the first opening for receiving a data media to be inserted into the slot.

49. (new) A video system comprising:

- a first display mounted in a first vehicle seat headrest;

- a media player mounted in the first vehicle seat headrest, wherein the media player is connected to the first display;

- a second display mounted in a second vehicle seat headrest, wherein the second display is a slave display; and

- a wire transmitting data from the media player mounted in the first vehicle seat headrest to the second display mounted in the second vehicle seat headrest.
